Executive course

Electricity Markets

From day-ahead to balancing, from intraday trading to capacity mechanisms: how electricity markets function in practice

8-9 October in Berlin

neon.energy/courses

Prof. Dr. Lion Hirth

What you'll learn

What determines power prices

From the principles of marginal pricing to the current Merit Order debate

Prices, trading, and market design

Spot, intraday and balancing – how electricity markets work in practice

Hedging and risk management

Mitigating price risk through forward markets, support schemes and capacity mechanisms

Locational pricing

Nodal pricing, market coupling and the bidding zone debate

Your benefits

Deep insights, clearly explained

We make complex economics and regulation easy to understand – without oversimplifying

Always up to date

The latest developments, straight from the Berlin and Brussels policy bubbles

Expand your professional network

Connect with experts and decision-makers from across the power sector
