Anton Hoffmann

SHORT BIO

Anton Hoffmann works as Consultant. He holds a master's degree in public policy from the Hertie School, specializing in energy economics and policy. During his studies, he completed a nine-month professional year in the Policy Department of the German Federal Ministry of Labour and Social Affairs. He also gained experience at consulting firms Fichtner and Kienbaum, where he supported clients from the energy sector and the public sector. Other professional roles included positions at BASF and the German Chemical Industry Association, where he focused on European energy and climate policy. Immediately prior to joining Neon, Anton worked as a research associate at the Hertie School.

POSITIONS
